

# Type 550X

## Miniature I/P, E/P Transducer

Accurate and economical electronic pressure control

The Type 550X is an electronic pressure regulator that converts a variable signal (current or voltage) to a proportional pneumatic output. Its compact housing, accessible ports and easy adjustments provide an ideal answer to applications that are space-constrained. This economical instrument provides precision air pressure regulation to actuators, valves, positioners and other final control elements. An integral volume booster provides high flow capacity, increasing control speed in critical applications.

### Features

- **Compact Size**  
Great for high density mounting
- **Easy Wiring**  
Conduit, terminal block, M12 or DIN 43650 connections
- **Mounting Options** Wall, panel, DIN rail, pipe or manifold mounted (Type 925)
- **Input/Output Ports on Front and Back**  
Provides flexible pneumatic connections
- **External Zero and Span Adjustments**  
Convenient field calibration
- **Intrinsic Safety Approvals**
  - ◊ Factory Mutual (FM)
  - CS Canadian Standards Assoc. (CSA)
  - Ex ATEX (option)

# Type 550X Miniature I/P, E/P Transducer

## Principles of Operation

The Type 550X I/P, E/P Transducer is a force balance device in which a coil is suspended in a magnetic field by a flexure. Current flowing through the coil generates movement of the flexure. As this assembly moves towards the nozzle, it creates backpressure, which acts as a pilot to an integral booster relay. Input signal increases cause an accurate proportional change in output.

Zero and Span are calibrated by turning adjust screws on the front face of the unit. Adjustment of the zero screw repositions the nozzle relative to the flexure. The span adjustment is a potentiometer that controls the amount of current through the coil.

The zero-based version of the Type 550X incorporates an integral negative bias booster relay. The negative bias allows the unit to provide zero output while the booster section amplifies the pressure to provide outputs up to 120 psig.
