

TEMPERATURE SENSORS WITH INTEGRATED PROTECTION TUBE OR ADDITIONAL THERMOWELL TYPE CT

- ✓ RTD (Pt100, Pt1000) and TC sensors
- ✓ ATEX Exia certificate
- ✓ ATEX Exd certificate
- ✓ DNV/GL marine certificate

Features

Temperature sensors CT are offered as Pt100/Pt1000 resistance thermometers or thermocouples.

In resistance sensors (RTD) platinum resistors change their electrical resistance as a function of temperature. RTD, the most commonly used sensors in industry, are suitable for applications between -196...+600°C. The accuracy classes A and B are available with a tolerance acc. to IEC60751.

Thermocouples are made of two different conductors joined at the end. The temperature difference between junction, placed in measuring point (hot junction), and wire ends (cold junction), generate voltage proportional to the difference of temperature between these junctions. Thermocouples are suitable for the measurement of high temperatures, up to 1700°C. The accuracy classes 1 and 2 are available with tolerance acc. to IEC60584.

Description

Temperature sensors model CT are offered in two designs:

- with integrated protection tube, fully welded and screwed into enclosure.
- for additional thermowell: machined from bar stock or from pipe.

In both cases sensors are equipped in spring- loaded measuring inserts which are replaceable. The interchangeable inserts can be replaced without dismantling sensor from installation. This enables inspection or, if necessary, service without stopping of running production process.

Sensors are suitable for gases and liquids. A large number of approvals and wide choice of process connections, connection heads, lengths of immersion and necks, types of measuring elements and materials of wetted parts allow for applications in:

- power industry
- chemical and petrochemical industry
- marine and offshore industry
- heavy industry
- food industry
- machine building
- plant construction

Technical details

Process part type	Measuring range
GB1	Pt100: -70...150°C Marine version: -25...150°C
GN1	Pt100: -70...500°C / -196...150°C 1) TC type J/K: -40...-550°C Marine version: -25...500°C
T1	Pt100: -70...500°C / -196...150°C 1) TC type J/K: -40...-550°C Marine version: -25...500°C
P1	Pt100: -70...500°C / -196...150°C 1) TC type J/K: -40...-550°C Marine version: -25...500°C
GB1X + thermowell	Pt100: -70...150°C Marine version: -25...150°C
GN1X + thermowell	Pt100: -70...500°C TC type J/K: -40...570°C Marine version: -25...500°C

¹⁾ Only CT-CL version

²⁾ Only CT-AL version

³⁾ Location of complete equipment in zone 1 or 21

⁴⁾ Measuring stem with screwed to the opening D2 of housing thermowell, with proper wall thickness (zone 0 or 20):

a) minimum 1,5mm, made of corrosion resistant steel or

b) minimum 1mm and fixed in protective thermowell (wall thickness minimum 1mm) made of corrosion resistant steel
