

TANK LEVEL INDICATORS

.....Push Button Self Closing Valve in Bronze.....

The push button self-closing isolating valves keep the gauge isolated from main stream supplies or storage tanks until the button is pressed to take a level reading.

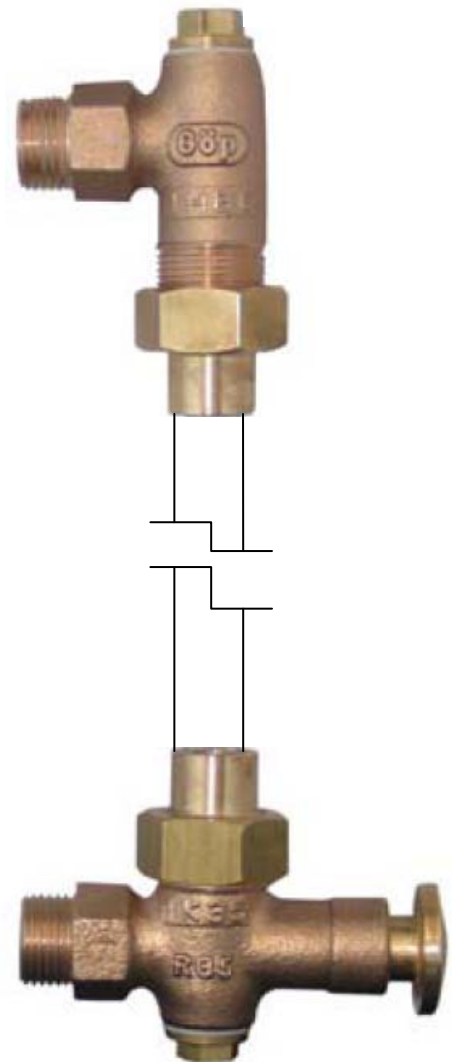

Generally used for small oil and fuel tanks in the marine, and Industrial sector. The push button self-closing isolating valves prevents leakage in the event of a tubular glass break.

Features & Benefits

- prevent leakage in the event of a tubular glass break.
- tubular glass or Lexan tube in any length required.
- the centre to centre size is required when tube and protector are to be supplied.
- Pressure range: up to 16 Bar (only valves).
- Temperature Range: 0°C to 100°C (only valves).

Optional

- tube guard protector.
- spare sealing rings.
- threaded flanges on request.

Body Bronze..... LG2
